

## JTAG Adapters and Interposers

JTAG adapters and interposers fit on the end of personality modules or flex cables that runs from the emulator to a device under test (target). These products may be purchased separately and can be used with Arium SourcePoint JTAG debuggers (emulators) for ARM and Intel respectively.

### JTAG Test Access Ports, Adapters, & Reference Boards

	<p><b>ARM-MINIT</b></p> <p>Cortex small form factor JTAG adapter with 4-bit trace (38-pin Mictor to mini 20-pin with trace)</p>
	<p><b>ARM-MICT</b></p> <p>Mictor JTAG adapter (20-pin to 38-pin Mictor)</p>
	<p><b>ARM-NVDA</b></p> <p>ARM to Nvidia Harmony JTAG adapter (20-pin mini to 22-pin)</p>
	<p><b>ARM-TI-ADP</b></p> <p>ARM to TI OMAP adapter</p>

 <p>The image shows a flat, orange-colored adapter cable. One end has a 26-pin connector, and the other end has a 60-pin connector. Text on the cable includes 'ARIUM', 'ASSY 918-25178', 'REV [ ] S/N [ ]', and 'INSERT THIS SIDE UP'.</p>	<p><b>XDP-SFF-26</b></p> <p>26-&gt;60-pin adapter to small ITP JTAG port. For boards with debug ports whose pins lie parallel to the board. For use with ECM-50/PBD-XDP, ECM-XDP, and ECM-XDP3.</p>
 <p>The image shows a flat, orange-colored adapter cable. One end has a 24-pin connector, and the other end has a 60-pin connector. Text on the cable includes 'ARIUM', 'PB-D97819-001', and 'XDP-SFF-24 P116'.</p>	<p><b>XDP-SFF-24</b></p> <p>24-&gt;60-pin adapter to small ITP JTAG port. For boards with debug ports whose pins lie parallel to the board. For use with ECM-50/PBD-XDP, ECM-XDP, and ECM-XDP3.</p>
 <p>The image shows a flat, orange-colored adapter cable with a small green PCB component mounted on it. One end has a 28-pin connector, and the other end has a 60-pin connector.</p>	<p><b>ITP-FLXXDP</b></p> <p>28-&gt;60-pin adapter to small ITP JTAG port. For boards with debug ports whose pins lie parallel to the board. For use with ECM-50/PBD-XDP, ECM-XDP, and ECM-XDP3.</p>
 <p>The image shows a flat, orange-colored adapter cable. One end has a 25-pin connector, and the other end has a 28-pin connector.</p>	<p><b>ITP-FLX</b></p> <p>25-&gt;28-pin adapter to small ITP JTAG port. For boards with debug ports whose pins lie parallel to the board. For use with ECM-50/PBD-700/700M.</p>
